OBJECTIVE

Software Engineer with 4+ years of industry experience in developing robust and scalable microservices and responsive web apps. I excel at team leadership, software development, and cross-functional collaboration. I like to be in a challenging position because adversities have taught me the most.

EDUCATION

Bachelor of Technology in Computer Science, VIT Chennai

8.24 CGPA, 2015-2019

SKILLS

Technical Skills	Java, MySQL, ActiveMQ, SpringBoot, Hibernate, JUnit Javascript, ReactJS, ES6, GIT, WebSockets, REST api, PR Reviewer, Problem Solving, Quick-Debugger, Build Optimization
Soft Skills	Passionate and technology agnostic developer, mentor new hires, guide team, effective communicator, close collaboration with BAs, Architects, UX designers, and Data engineers

EXPERIENCE

Associate Engineer

June 2019 - Present

Deutsche Bank - DWS Group

Pune India

- Received **CEO Recognition award** for handling multiple projects with ambitious deadlines while increasing overall code quality and participating in end-to-end deployment process.
- Project **delivery ownership** of Transaction Reporting regulatory project which helped mitigate millions of **operational cost and regulatory fines**.
- Took responsibility of **UI team lead** during the critical phase.
- Involved in core services **platform library** such that generic components can be used across all projects to reduce individual project completion timelines.

PROJECTS

Transaction Reporting. Worked as Full Stack engineer, built a tool for regulatory teams using ReactJS and SpringBoot. Created long-running query API that handles over 50M records, additionally created API for various analytical data and a comment section for better collaboration.

Planeta. Worked as UI engineer, built a trader's tool for reducing custodian's cost using ReactJS and typescript. The daily net flow of transactions covered over 4M USD. Migrated project from JS to TS.

NAVA. Worked as Full Stack Engineer, built a tool for reducing trade outliers, developed user control flow API for better collaboration between different user groups. This generic API caters flow of different financial instruments.

EXTRA-CURRICULAR ACTIVITIES

- Working with Anayata Foundation, where the motto is to help women to resume their work-life who had to take a break due to societal and various other reasons.
- Writer for blind students since 2019.

LEADERSHIP

- Supervised team of 9 across 3 locations and 2 time zones for last year, built a technology discussion platform for the team's collective growth. Regular one-on-one making sure there is contentment within the team.
